

*my***SITE**
workstation system

 **PRECISION**

my**SITE**[®]
workstations

*'my**SITE** workstation systems offer a fresh look in design, functionality & performance providing a complete solution for any office'*

Fixed height, technician height adjustable and user height adjustable desking options are available to meet the needs of today's dynamic office environment. Furthermore, the desk shape can be selected from options of **straight**, **90°** and **120°** to best utilise space allocations encouraging communication, and collaboration between team members within an organisation.

A sleek frame design offers each occupant increased leg room and incorporates multi-functional cross rails, allowing for easy installation or re-configuration of cross rail and desktop mounted workstation accessories. A low profile foot ensures mobile cabinets can be easily placed under all areas of each work surface and incorporate adjustable glides for leveling of work stations over uneven floors.

*A full range of my**SITE** accessories are available to personalise each workspace.*

\ user

90°

Equal length 'L' shaped workstations provide an *optimum amount of useable workspace*. The corner depth is highly suited, but not limited, to the positioning of computer visual displays. The 90° configuration facilitates various layout options to create team environments.

Above Picture consists of: 1800 x 1800 user height adjustable workstation with undercut worktop | 1800 x 1200 high desk mounted 'to floor' screen | Desk mounted accessory panel with 2 x paper trays and 1 x shelf | Modesty screen | CPU holder

120°

The 120° configuration offers the opportunity to create *collaborative spaces* whilst utilising a highly ergonomic work shape that allows the occupant to access all areas of the desktop from one seated position.

Main Picture consists of: 1400 x 1400 fixed height workstation with undercut worktop | 1400 x 900 high desk mounted 'off floor' screen | Desk mounted accessory panel with 2 x paper trays and 1 x shelf | Modesty screen | KURVE 1 1/2 drawer mobile cabinet

user

fixed

° straight

A flexible configuration that offers the capability to create various different office layouts such as workstation pods or rows from one worktop shape. Size options allow for workstation selection to be chosen on a task based nature. Computer displays can be positioned at any point along the back edge of the worktop, which allow occupants to configure the work space to suit their preferences.

Above Picture consists of: 1800 x 850 technician height adjustable workstation with undercut worktop | 1800 x 1200 high desk mounted 'to floor' screen | Desk mounted accessory panel with 3 x paper trays | KURVE 1 1/2 drawer mobile cabinet

workstation frame options

The mySITE workstation system is available in three different options; user height adjustable, technician adjustable and fixed height. A standard leg design ensures a seamless look throughout an office is maintained if a combination of these options are used.

user

The user height adjustable option features a newly developed, maintenance free and extremely reliable drive mechanism operated from an extendable under-desk handle.

tech

Technician adjustable workstations are operated by adjusting each leg independently. Each leg has a push button release mechanism to adjust the height of the leg.

fixed

Fixed height workstation frames are set to a standard height of 710mm above floor level.

Both user adjustable and technician adjustable workstations have a height range from 580mm to 810mm above floor level.

workstation top shape options

mySITE workstations are available in 90 degree, 120 degree or straight configurations, which can be used individually or in combination, to meet the requirements of any interior fit out.

workstation edge detail

Select from a choice of two standard edge details; an undercut profile provides a slimline profile to the front edge of each worktop whilst incorporating cable management 'scallops' to the rear edge; a 2mm PVC edging with integrated worktop cable ports provides a more traditional look to each workstation.

undercut

2mm pvc

colours & finishes

Work Surfaces

Low Pressure Laminate (LPL) 25mm board, with an MDF substrate; refer to the PRECISION's standard colour range for options. Other colour options are available upon request.

Workstation & Screen Frames, plus Accessory items

All steel and aluminium components are finished in a durable polyester powder coat. Standard colour is silver. Other colour options are available upon request.

Screen Fabric

Choose a range and colour from the Precision standard selection of fabrics.

Modesty Panels

Panorama Extra View Plus range of sunscreen fabric;
Colour: Midnight.

Plastic capping, handle, screen junctions & connectors

Frosted clear polycarbonate

environmentally friendly options

Work Surfaces

Precision recommends Melteca on 'EO' MDF substrate. This complies with the very low formaldehyde emission level of less/equal to 0.5 mg/l, as defined in AS/NZS 1859 Part 2 (2004) for MDF. This board is manufactured in facilities, which comply with ISO14001 made with a percentage of pre-consumer recycled content and contributes points to Green Star NZ Office Design ratings.

Screen Fabric

Precision recommends the Rim Evolve range of fabric for mySITE. Evolve is manufactured from post industrial, recycled polyester fibre and is 100% recyclable after its intended use. Rim fabrics are manufactured to ISO14001 certification.

accessories

All mySITE accessories have been designed to enhance the functionality of each workspace. Accessories can be installed and positioned to suit the working practice of each individual occupant and can be repositioned without the need for specialist tools or personnel.

screen

To define work units or to provide privacy from high traffic areas and corridors, mySITE screens simply locate over the desk frame cross rails by way of sturdy brackets. This design eliminates permanent fixing and subsequent damage to either the screen or the desk.

Repositioning of screens can be completed quickly and easily as office layouts change.

This design also means the screens remain independent from the work surface and therefore are not affected by any variable in adjacent height adjustable work stations.

The screens are constructed using fabric covered pinnable material surrounded by a hardwearing powdercoated aluminium frame.

Junction connectors ensure clusters of screens remain vertically aligned throughout the office. These connectors are easily removed (non-permanent) to facilitate reconfiguration.

cable management

The mySITE cable management trays are a simple dump-tray system, which clip into the cross rails of the workstation creating a discrete reticulation system for power and data cables. Manufactured from durable powdercoated steel, the trays feature two channels to keep power and data cables segregated.

Extensions trays are available to span between workstations so fly leads can travel from one workstation to another.

Being cross rail mounted, the cable management trays remain at a static height and not affected by the variable heights of adjustable work surfaces.

desk shelf

Manufactured from durable powdercoated steel, the mySITE desk shelf can be located at any point along the back edge of each desk and lock into place by way of user friendly clamps. Adjustable polycarbonate dividers provide support for books, files and folders along the length of the shelf.

modesty panel

The mySITE fabric modesty screen provides sub worktop privacy by way of an innovative, lightweight fabric panel secured to the underside of the desktop. The mounting bracket design allows for power and data cabling to be passed through from sub frame cable management trays up onto the worktop.

accessory panel

The mySITE accessory panel can be located at any point along the back edge of each desk and lock into place by way of user friendly clamps. Simple to use accessories such as shelves and paper trays easily clip into the panel to suit the working preference of each user.

cpu holder

Two CPU holder options are offered within the mySITE workstation system. Firstly, a leg mounted unit, with adjustable nylon strap, can be located at either end of the workstation (to suit user and layout preferences), positioning the CPU at ground level. The innovative design can also hook onto the sub-frame cross rail allowing the CPU holder to be positioned anywhere under the work surface. Secondly, a surface mounted cradle is screw fixed to the underside of the worktop and completely encases the CPU. This option comes in two sizes to suit IT requirements.

our commitment to environmental sustainability

We believe there are several environmental issues relating to our industry which include, but are not limited to air, atmospheric and water pollution, climate change, ozone depletion, depletion of natural resources, and the decline of natural habitats.

PRECISION understands that the consumption of energy, water and materials, and the generation of waste (solid, liquid and gaseous) are amongst some of the primary causes of these problems. We acknowledge that the building and furniture industries play a part in causing many of these problems.

In light of these issues, we believe that it is in our interests, and the interests of our clients, staff and other key stakeholders to make a change for reducing the environmental impact of our products and services.

This is why PRECISION is committed to making the concept of environmental sustainability a reality.

The development of mySITE was based around a focus utilising materials that are of a sustainable nature and has been designed for ease of disassembly into base materials for recycling.

The modular system allows for effortless refurbishment when work styles and trends change or new configurations are required.

warranty

All PRECISION products are manufactured to an extremely high standard. As such, we will provide a full repair or replacement warranty, to the original owner, on faulty parts, materials and workmanship for all products as follows (or as otherwise stated on a range by range basis), and we will make all reasonable endeavours to rectify any such deficiencies to our customers' satisfaction:

- Steel products, such as vertical filing cabinets, Smartstore cabinets, shelving etc are covered by a lifetime warranty.
- Wooden furniture, such as desks (and associated accessories, including all steel frame work), mobiles, credenzas etc are covered by a five year warranty.

These warranties shall cover all material and labour to satisfy valid claims but expressly exclude items of normal wear and tear, misuse or damage. Any deficiency resulting from subsidence or building movements is also excluded from any warranty claim. Repairs completed to product that are not covered by these warranties will be subject to a charge. For further clarification, please contact PRECISION.

industry standards

mySITE has been designed to meet, or exceed, the minimum industry standards required for commercial workstation furniture.
