Shelving | mobile shelving

Features & benefits

- Takes up to 60% less floor space than traditional storage systems of equivalent capacity.
- Mini (manual) or Maxi (mechanical) systems are available to meet load requirements or to suit unit lengths
- Maxi units are mechanically driven for total ease of movement.
- Mechanically driven units feature a combination crankhandle/handwheel for user comfort
- Safety stop mechanism is located in the centre of the handwheel

Handle detail

High density storage

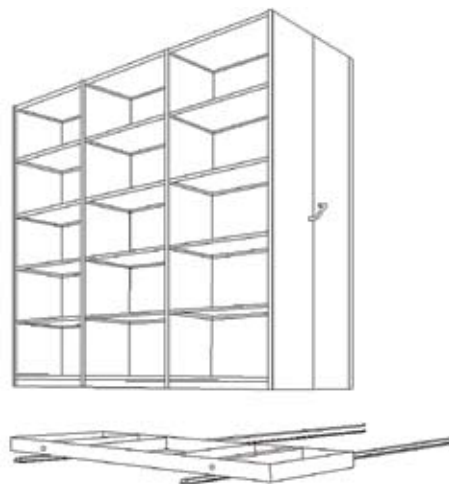

Description

Component dimensions

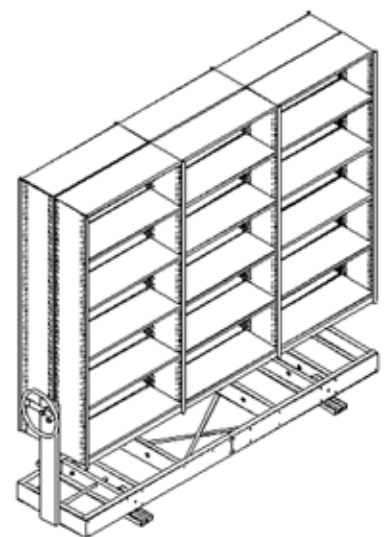

- Mobile chassis and static plinths are manufactured to suit specified shelf depths and number of consecutive bays long
- Chassis Heights (from floor, includes rails)
Mini 135mm, Maxi 190mm
Add shelving height to get overall unit height
- Maximum Weight Loadings (per double faced bay)
Mini 850kgs, Maxi 1150kgs (excludes empty weight of system)
- Weight loading capacity of the floor supporting the mobile shelving system needs to be considered as part of the planning process

Standard colours

● Black	● Deep Sea
● High Voltage	● Midnight Blue
● Silver Comet	● Rivergum
● Oyster Grey	● Dune
○ White Satin	● Flame Red
