

Introduction

Free standing and desk mounted Focus screens provide colour co-ordinated private work areas that can be easily and inexpensively modified. Focus freestanding divider screens link together to define spaces within a working environment. Focus desk mounted screens mount to any desk surface using clamp system brackets. The screens are manufactured from pinnable fabric covered material, finished with a durable powder coated aluminium frame. The unique screen connection system allows for quick and simple installation or relocation. All divider screens include adjustable glide feet for easy levelling over uneven floors.

Features

- Freestanding or desk mounted
- Tool-less connection between screens
- Fabric covered pinnable substrate
- Available in a range of colours to match any interior
- 32mm aluminium frame
